### System Requirements

- ▶ Any Buffalo AirStation wireless product with an MC connector

# Installing a 2.4GHz Indoor Omni Antenna on an AirStation

**1** Locate the antenna connector sliding door on the rear of the AirStation.

**2** Slide the door down on the rear of the AirStation to reveal the external antenna connector.

**3** Connect the antenna to the AirStation by plugging the male MC connector on the antenna cable to the female MC connector on the AirStation. Push firmly into place to ensure a good connection.

**4** Run the cable down the left side of the AirStation and push behind the plastic tab to keep the antenna from coming loose.

## Installing a 2.4GHz Indoor Omni Antenna with an AirStation Client Card

**1** Locate the rubber plug hiding the external MC antenna connector on the top of the AirStation 54Mbps Notebook Adapter.

**2** Pull the rubber plug to reveal the external antenna connector.

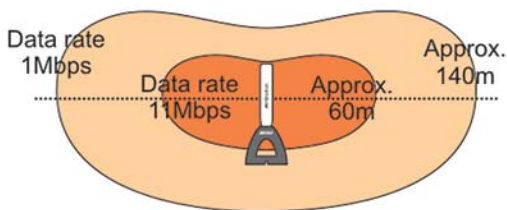

**3** Connect the antenna to the Notebook Adapter by plugging the male MC connector on the antenna cable to the female MC connector on the Notebook Adapter. Push firmly into place to ensure a good connection.

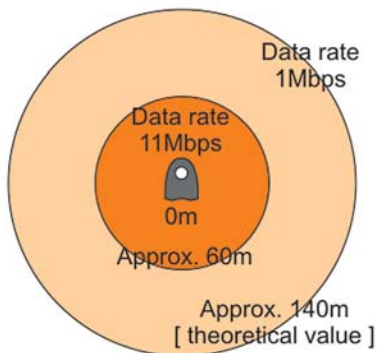

**NOTE:** Client Cards with external antenna support vary but installation remains the same.

Simple wall installation of the Indoor Omni Antenna with the attachment of 2 screws.

Approximate range of signal using the 2.4GHz Indoor Omni Antenna.

Wireless Signals are affected and depend on operating environment.
